

4-Bike Carrier Assembly Instructions

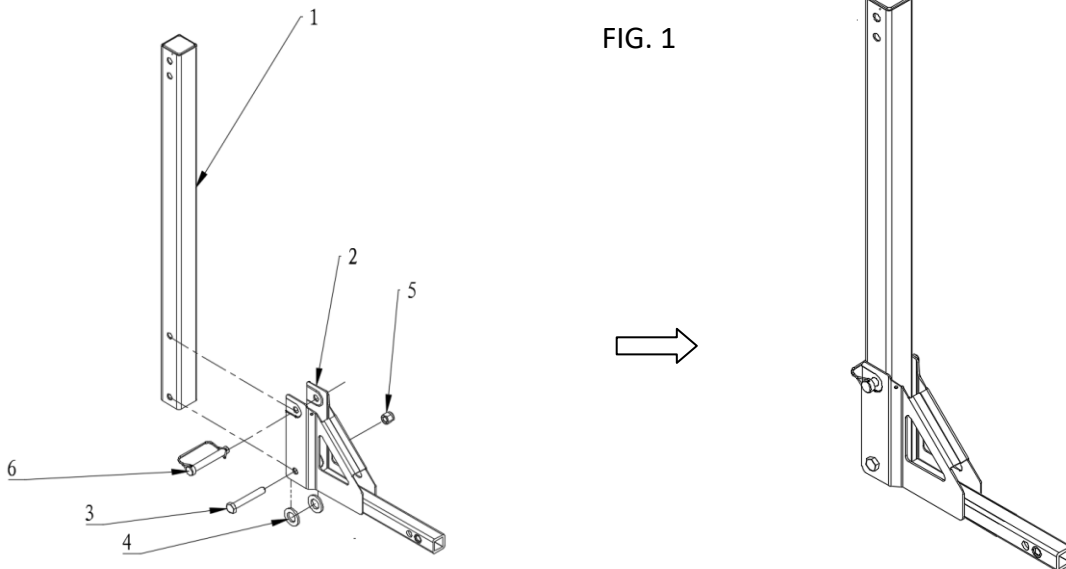

Recommended tools for assembly (not included):

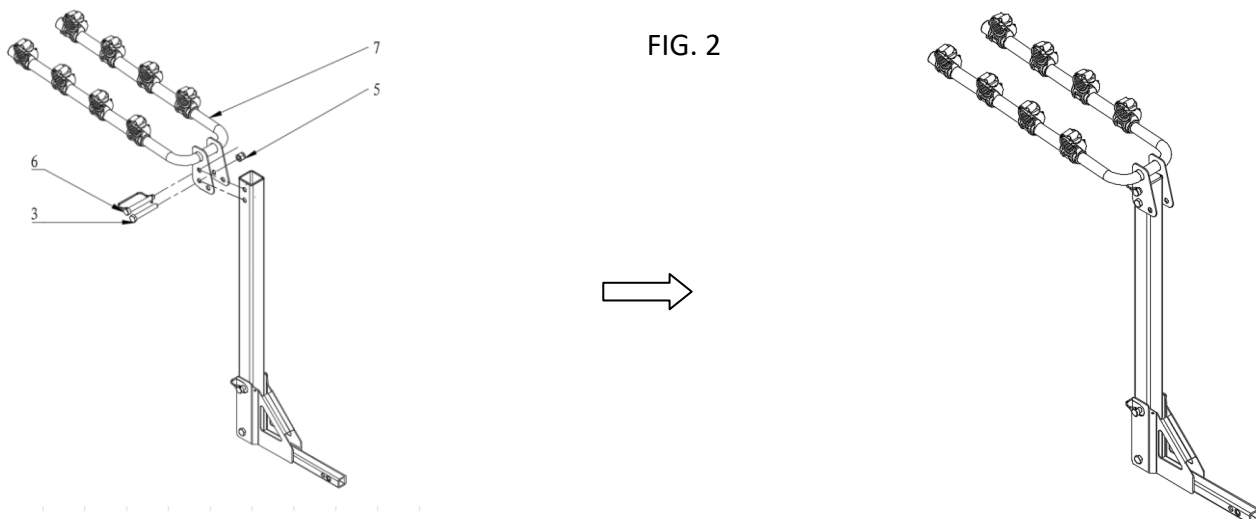

Wrench
Size: 19 mm

STEP 1: Attach main support tube (1) to the mounting bracket (2). Line up the hole near the end of main support tube with the hole on the mounting bracket. Install **hex bolt (3)**, **2 nylon flat washers (4)**, and **locknut (5)** as shown. Tighten locknut until it's tight. Main support tube must rotate after tightening.

STEP 2: Re-install **bail pin (6)** through mounting bracket and main support tube so the bike carrier is in upright position.

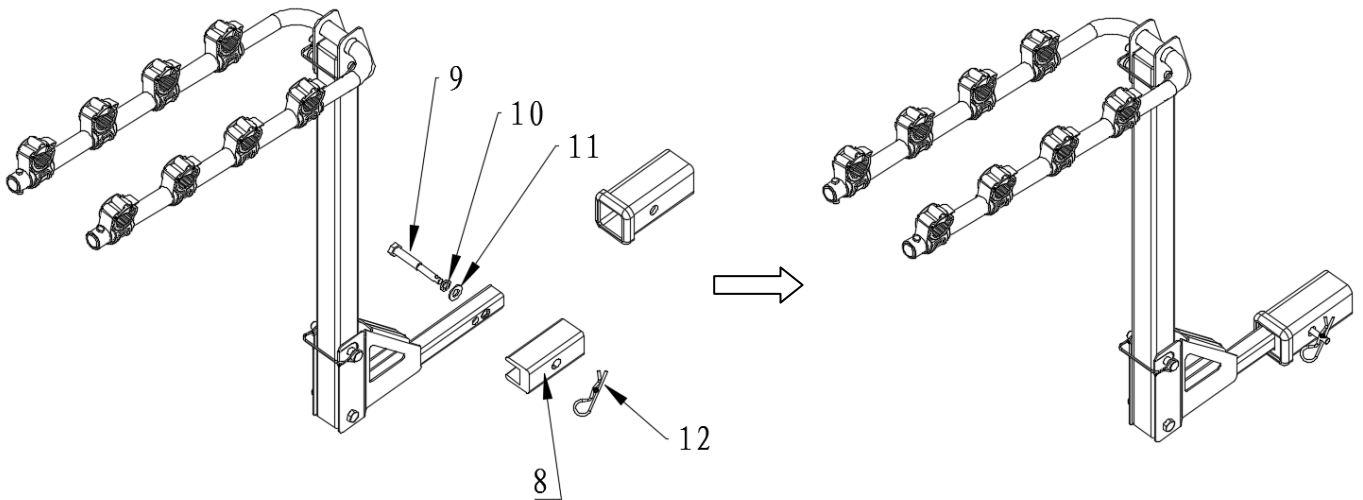

STEP 3: Pull bail pin (6) from mounting bracket and arm assembly (7), Attach arm assembly to main support tube with hex bolt (3), and locknut (5) as shown. Line up the hole at the end of support tube with the hole in the arm assembly. Re-install bail pin through arm assembly and main support tube.

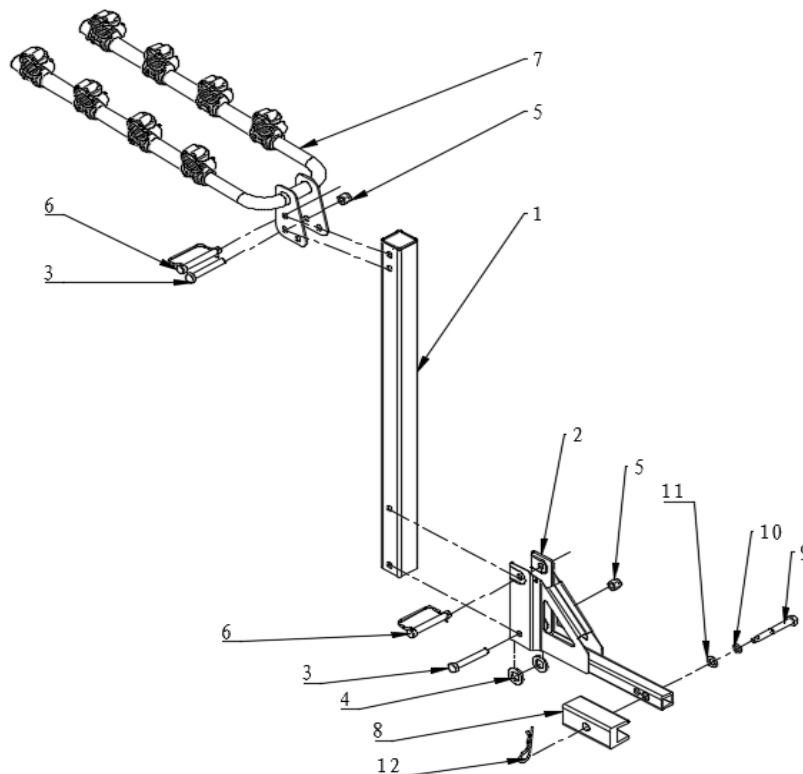

Vehicle Mounting Instructions:

1. For a 1-1/4" Receiver hitch use **anti-rattle pin (9)**, **spring washer (11)**, **flat washer (10)** and **pin clip (12)** as shown. Tighten with 19mm wrench (not provided).
2. For a 2" Receiver hitch use **2" Adapter (8)**, **anti-rattle pin (9)**, **spring washer (11)**, **flat washer (10)** and **pin clip (12)** as shown. Tighten with 19mm wrench or socket (not provided).
